

**Exemption §106.182 Checklist
(Previously Standard Exemption 33)
Ceramic Ware Kilns**

The following checklist has been developed so the Texas Commission on Environmental Quality (TCEQ) can confirm you meet exemption requirements. The questions are derived from §106, Subchapter A, and the exemption List. Please read all questions and check YES or NO (equivalent to True or False), or give specific information as applicable to your facility. If you do not meet all conditions of a specific exemption, you will not be allowed to operate the facility under exemption and you must apply for a construction permit as required under §116.111 prior to construction.

<u>Part</u>	<u>YES</u>	<u>NO</u>	<u>Description</u>
	_____	_____	Kilns are used for firing ceramic ware
	_____	_____	Kilns are heated by natural gas
	_____	_____	Kilns are heated by liquid petroleum gas
	_____	_____	Kilns are heated by electricity
	_____	_____	Kilns are heated by any combination of above
a)	_____	_____	The total heat input is 10 million Btu per hour or less
b)	_____	_____	This facility will have emissions of lead
	_____	_____	This facility will have emissions of beryllium
	_____	_____	This facility will have emissions of fluorides
	_____	_____	Emissions of SO ₂ from both the material being fired and fuel burned exceed 25 tons per year.
	_____	_____	Emissions of Particulate Matter (PM) from both the material being fired and fuel burned do not exceed 25 tons per year
	_____	_____	Calculations of SO ₂ and PM emissions from both the material being fired and fuel burned are attached.
